Detailed Rationale & Key Rating Drivers

The revision in the ratings assigned to the bank facilities and NCD issue of Intec Capital Limited (ICL) factors in the continued deterioration in the asset quality of the company. Furthermore, the financial performance in FY17 (refers to the period April 01 to March 31) is marked by consolidation in the operations resulting in significant decline in total income and profitability. The rating also factors in the company's exposure to small and medium enterprises which have relatively weaker credit and business risk profiles and ICL's moderately diversified asset book. The ratings however, derive strength from the company's long track record of operations, comfortable capital adequacy, diversified borrowing profile and adequate liquidity.

The ability of the company to re-establish the business growth while improving its asset quality, spreads and capital adequacy, would be the key rating sensitivities.

Detailed description of the key rating drivers

Key Rating Weaknesses

Deterioration in asset quality: Gross NPA ratio and Net NPA ratio have deteriorated to 21.16% and 17.66% respectively as on March 31, 2017 vis-à-vis 11.00% and 9.01% respectively as on March 31, 2016. Also, Net NPA/ Net worth has deteriorated to 65.6% as on March 31, 2017 vis-à-vis 47.01% as on March 31, 2016. Further, despite the reduction in loan portfolio the Provision Coverage remained similar at 20.1% in FY17 (19.8% in FY16).

Decline in business and profitability parameters – The net loan portfolio declined by 23.5% to Rs. 520 crore as on March 31, 2017 vis-à-vis Rs. 679 crore as on March 31, 2016. The disbursements during FY17 declined by 80% y-o-y to Rs. 72 crore as against Rs. 358 crore in FY16 as a conscious business strategy to consolidate loan book. Total income was lower by 26% to Rs.97.48 crore in FY17 (Rs. 131.73 crore in FY16). The NIM decreased to 5.87% in FY17 from 7.26% in FY16, on account of lower AUM and the ROTA also decreased to 0.06% for FY17 from 0.86% in FY16.

Exposure to small and medium enterprises: ICL lends to SME sector which has high inherent risks and is more susceptible to downward trends in economic cycle. Given high inherent risk of the sector, performance of the advances is critical in determining the profitability and asset quality of the company in the future. Also, ICL lends at fixed interest rates whereas it borrows at floating interest rates. Therefore, the Nil of ICL would be positively impacted in a decreasing interest rate scenario.
